

LiveWell Granville: A Healthy Carolinians Partnership GUIDING PRINCIPLES

GOAL

To provide the leadership, support, services, and service accessibility needed so that every citizen can choose to live healthier, happier lives.

MISSION

- To understand community health needs
- To link people and partners to resources
- To improve services to the underserved

VISION

- Healthy Carolinians of Granville County recognizes that communities are living, growing groups of people whose needs change with time. A commitment to a process of on-going assessment will allow the Partnership to understand Granville County's health needs as they evolve.
- A healthy community provides an opportunity for all members to enjoy a life of physical and emotional health. Creating links between Partners that provide services, as well as to the people that need them, will maximize our county's resources.
- In a healthy community, the benefits of good health reach all its members. The Partnership will strive to address the needs of those who bear the greatest burden of ill health.

COALITION FOCUS ISSUES

1. Narrowing the health disparity gap between whites and non-whites
2. Improving resources for and care of children and youth
3. Preventing chronic disease through expanded health promotions activities
